

Capitales de América Latina

You are the new Tourism Minister for your Latin American country. Your task is to attract potential tourists to your country's capital by creating an art piece displaying the capital's attractions and by writing an informative paper describing the capital's highlights. Here's what they should include:

Art Piece

You are going to paint a sign of your capital's name. It will be painted on a thin wooden board that you will cut in any shape you'd like (you will cut the board with a jigsaw). The maximum size of the sign will be 17" x 11".

The goal of the sign is to capture your capital's (and country's) **essence/vibe/culture/feeling/history** in a creative, neat, and visually appealing way. Use landmarks and attractions to either form the letters or the background of the sign.

Informative Paper

You will write a paper describing your capital and what it's like. Each paper will be a bit different depending on your role in the POD - member, captain, or president. You will receive the requirements during your mini-lesson.
